

LINTFREE

Characteristics:

Lintfree is a strong, low linting, absorbent nonwoven fabric which has been manufactured from a blend of synthetic and cellulose fibres.

Applications:

This substrate is suitable for a range of hard surface and critical surface wiping applications.

Colour:

white

Technical data

Description		Unit	Value
Composition Polyester		%	48
Composition Woodpulp		%	52
Weight		g/m ²	69
Thickness		mm	0.39
Absorption capacity		%	490
Extrinsic absorption capacity		ml/m ²	337
Grab tensile breaking strength (dry)	MD	N	167
Grab tensile breaking strength (dry)	CD	N	75
Strip tensile breaking strength (dry)	MD	N	191
Strip tensile breaking strength (dry)	CD	N	50

The data are average values. We do not undertake any liability for the results of usage of this product. The technical data set forth in this datasheet reflect our best knowledge at the time of issue. The datasheet is subject to changes pursuant to new developments and findings, and a similar reservation applies to the properties of the products described.
